

Adrian Nier

Software Developer

In my eyes Apple products reflect a quality that amazes and inspires me every day. I also live this carefulness, determination and sustainability as a developer and human being. Since 2001, I have been realising solutions for companies and private clients that make Apple's devices a beloved tool and complex tasks a pure pleasure.

Recent Projects

FileMaker solutions for the following businesses:

- **Construction Equipment Rental**
Product management, resource planning, project management, accounting
- **European Food Distributor**
Resource planning, order management, accounting, controlling, reporting
- **Traditional Chinese Medicine Practice**
Patient records, remedy knowledge-base, accounting, payment tracking
